RESEARCH INTERESTS

My research focuses on human-aligned AI through multimodal representation learning. I develop frameworks that bridge human instructions and sensory signals with agent behavior. My work spans procedural content generation (PCG), 3D human pose estimation, and zero-shot coordination in both gaming and physical domains.

Keywords: reinforcement learning, multimodal representation learning, PCG, human-AI interaction, human pose estimation

EDUCATION

M.S. in Artificial Intelligence Aug 2023 – Aug 2025
Gwangju Institute of Science and Technology (GIST)
Department of AI Convergence (formerly Graduate School of AI)
GPA: 4.20/4.50

- **Thesis:** *Human-Like Procedural Level Generation via Reinforcement Learning with Contrastive Language-State Embedding*
- **Advisor:** *Kyung-Joong Kim*

B.S. in Computer Science and Engineering Mar 2017 – Feb 2023
Dongguk University
GPA: 3.96/4.50

PROJECTS

Funded Research

Instruction Agent Research based on Natural Language-Reward Function Embedding Jul 2024 – Jun 2025
Principal Investigator (PI) *National Research Foundation (NRF), Korea*

- Led an NRF-funded project on language–reward representations and instruction-conditioned RL, from proposal writing through MuJoCo validation and final reporting.

HCI + AI for Human-Centered Physical System Design Oct 2023 – Jan 2025
Graduate Researcher *GIST-MIT Project, GIST*

- Contributed to tactile sensing and motion-capture setup; proposed and implemented SCOTTI's CNN–Transformer encoder for pose, action, and progress prediction. [5,6]

Human Activity Recognition & Object Detection for Art Creation Dec 2022 – Mar 2023
HAR Model Development & Mobile Integration *Samsung C-Lab / Dongguk University*

- Proposed, trained, and evaluated the HAR model; supported ONNX conversion and Android inference integration into a teammate-developed app.

Academic Projects

PCGRL Research Series: Language-Instructible and Human-Aligned Level Generation Jan 2025 – Jan 2026
Academic research series

- **HL-PCGRL:** Designed and implemented contrastive language–state learning and RL level generation; conducted experiments and thesis writing.
- **VIPCGRL:** Designed models and shared-representation losses, implemented training and RL integration, and served as a main writer. [1]
- **IPCGRL:** Advised on method adaptation, explored VAE/KL alternatives, and contributed to manuscript writing. [2]

Adaptive Curriculum Learning for Human-AI Zero-Shot Coordination Sep 2023 – Feb 2024
Graduate Researcher

- Implemented cross-play evaluation and analyzed curriculum difficulty for human–AI coordination in Overcooked. [4]

Game Development & Hackathons

Arcana Trigger Jul – Aug 2026 (2 weeks)
Co-Designer & Developer *Two-person team*

- Co-developed a Unity/C# game combining deck-building card combat and bullet-hell action for the NHN Game × AI Hackathon.

EXPERIENCE

Cognition and Intelligence Lab, GIST Sep 2025 – Jan 2026
Researcher (Post-Master's)

Artificial Intelligence Lab, Dongguk University Dec 2020 – Mar 2023
Undergraduate Research Assistant

SKILLS

Programming Languages: Python, C++
Frameworks: PyTorch, JAX, Flax
Languages: Korean, English (TOEIC 825)

AWARDS & HONORS

Master's Research Stipend Jul 2024 – Jun 2025
National Research Foundation (NRF), Korea · ₩12,000,000
Academic Excellence Scholarship, Dongguk University Sep 2022
